 +92 3317623336

Enthusiastic and self-motivated web designer with 5+ years of experience. Eager to join Studio Shodwe and bring my skill in frontend development, and visual design to every project that will be received in the future. Experience in designing user interfaces using Figma and developing responsive websites with HTML and CSS, focusing on clean layouts and intuitive user experiences.

Experience

- #### Front-End & UI/UX Design Projects

Gained hands-on experience in creating modern, user-centered interfaces using Figma, with a focus on usability, accessibility, and visual consistency. Designed interactive prototypes, wireframes, and mockups tailored to real-world user needs and feedback. Additionally, I developed responsive and visually appealing websites using HTML and CSS, ensuring cross-browser compatibility and smooth performance on various screen sizes. These projects helped me strengthen my design thinking, attention to detail, and understanding of front-end development best practices.
- #### Database & Collaborative Projects

Contributed to a comprehensive school management system database, implementing core modules such as student admissions, attendance tracking, fee structure management, and teacher assignments. This project involved designing relational databases and understanding the logical flow of academic administrative systems. Alongside academic projects, I also collaborated with seniors on multiple university-level tasks, where I played an active role in planning, coordinating, and executing project components. These collaborations helped me enhance my communication, teamwork, and real-time problem-solving skills in a professional setting.

Education

- #### College

2022-24
- #### GCU Lahore

2024-28

 - BS Computer science
 - Current gpa:3.46
